

BUILDING THE NEXT CHAPTER OF THE MAYVILLE PUBLIC LIBRARY

In 2018, the Library Exploratory Advisory Committee was formed to assist the Mayville Public Library Board in examining the needs facing the current library building. An analysis of the library found it to be small, outdated, and in spite of excellent maintenance over the years, in need of significant upgrades and repairs.

Having completed its initial mission, the Library Exploratory Advisory Committee was retired in early 2019 and the Library Building Committee and Library Fundraising Committee were formed to help the Library Board implement a solution for the challenges facing the library, helping this key part of the community continue to meet our needs for generations to come.

After more than a year of work, we're excited to share the solution for the future of the Mayville Public Library and to invite you to help us make it a reality!

WHAT WILL IT LOOK LIKE?

- Construction of a new 1-story, 18,000 SF new library downtown
- 14 dedicated spaces for various programs and uses; including,
- Study rooms, children and teen areas, maker space, art display area, community conference rooms
- ADA accessibility
- Energy efficient, sustainable design and systems

WHY DO WE NEED A NEW LIBRARY?

- Creates community space for events, study areas, meeting rooms, and special programs
- Expands access to digital resources and tools (computers, language learning, Wi-Fi, etc.)
- Library is past its useful building life, expensive to maintain, and inefficient
